Accessing the vCenter plug-in through vSphere 1

Accessing the vCenter plug-in through vSphere

You can access the Deploy vCenter plug-in through the vSphere web client.

Before you begin

The vCenter plug-in must be installed. In addition, the vCenter account you use when signing in to vSphere must have the following privilege:

- NetApp
  - ONTAP Select Deploy
    - Administrator

Steps

1. Sign out of the vSphere web client if you are signed in.
2. Sign in to vCenter using the vSphere web client, select HTML5, and accept the SSL certificate.

   Signing out and then back in refreshes the vCenter configuration information.

3. Click **Global Inventory Lists**.

Result

The options **ONTAP Select Clusters** and **ONTAP Select Deploy** are available in the pane on the left. If they are not displayed, you should sign out and then sign back in.
